Subject: Letter of Recommendation for Mike Bailey

To Whom It May Concern:

Mike reported to me during his first few weeks as a MSS SOC Analyst. His responsibilities included using LogRhythm SIEM to provide security monitoring, event analysis and countermeasure proposals on behalf of clients to reduce the impact of security incidents and system compromises.

Within just a few short weeks, Mike showed he was capable of handling all the logs coming into the SIEM console. This allowed me to progress in the transitioning of another team member with seniority into their new role. His attention to detail and his accuracy proved to be an invaluable asset to the group.

Overall, I certainly believe he has what it takes to make a positive contribution to any organization. I have no hesitation in recommending Mike Bailey for any position he wishes to pursue in his career.

Sincerely,

A handwritten signature in black ink, appearing to read "Stephen W. Holloway". The signature is fluid and cursive, with a long horizontal stroke at the end.

Stephen Holloway
SIEM Engineer II
